

Dheeraj jha

DevOps Engineer, Software developer, Tech lead

✉ Dheeraj@thedijje.com ☎ +918826810280 📧 @itsDheerajDotme 🗯 @thedijje

Profile

DevOps Engineer with 6+ years of experience in designing, implementing, and maintaining scalable, high-availability infrastructure. Proficient in CI/CD pipelines, cloud migrations, and infrastructure automation. Adept at leading cross-functional teams and optimizing processes for enhanced performance and cost-efficiency.

Skills

Devops and tools — Ansible, Jenkins, Gitlab-CI, CI/CD, Terraform, Code-deploy, Docker, Kubernetes

AWS — RDS, EC2, Cloudfront, ELB, SES, SNS, SQS, API Gateway, Lambda, LightSail, AWS CLI, AWS SDK, IAM, Cost management, SDKs and AWSCLI

Scripting Languages — PHP, Laravel, Codeigniter3, Python, Bash/Shell

Databases — MySQL, MongoDB, Redis

Observability — ELK, Prometheus, Grafana, Cloudwatch

Other skills — Git, Bash, Python, Networking concept, Firewall/IP Tables, DNS, Routing concept, Apache, Nginx, Pm2,

Professional Experience

Devops consultant, Anant Technologies

10/2023 | Remote, US

Role

- Coordinated with Product Owners and clients to identify product requirements and business compliance needs.
- Designed high-level and detailed system architectures, including traffic and cost estimates.
- Planned and implemented CI/CD pipelines using Infrastructure as Code (IaC) and managed version control with Git.
- Collaborated on the interface development and infrastructure setup of an AI-based patient management app, integrating ChromaDB and OpenAI. Managed the CI/CD pipeline to ensure seamless deployment and updates

Achievements:

- **Curated DevOps processes** for various clients, **improving delivery times by 80%.**
- **Automated** deployment processes using **Jenkins**, reducing **deployment times by 80-90%.**
- Setup monitoring tools, **automated recovery and setup zero downtime infrastructure.**

DevOps Engineer and Tech lead, Reevalo SaaS

2021 – 2023 | Remote, FR

Role:

- Coordinate daily with the Product Owner and cross-functional teams to understand the evolving product.
- Set up an efficient infrastructure for the team to handle tasks like data scraping, transformation, and cleaning.
- Identify team pain points and develop tools and solutions to boost their performance and efficiency.
- Plan and create dashboards with API integration to monitor servers and over 100 machines and processes.

Achievements:

- Performed cloud **migration** from **on-prem to AWS Resulting in higher availability and scalability**.
- **Reduced Cloud expenditure by 40-50%** during process scaling through **optimisation of both cloud infrastructure** and internal processes.
- **Significantly reduced 95% of the time** by fully **automating the data processing** from source to destination across various process and applications, **reducing process lifecycle from 30 days to 1 day**.
- **Crafted** a customised **process management tool** using **Python and Bash** to streamline diverse scraping operations and **gather metrics via APIs**, ultimately **achieved full automation of hundreds of pipelines**.
- **Developed central dashboards** using Codeigniter framework resulting in **visualising custom data-sets** from 10+ different processes, thus being single **transparent dashboard** for entire IT process.
- Worked with Developer team to guide on **API Optimization to reduce latency**.

Lead Developer, CTE International pvt ltd

08/2017 – 12/2020 | Gurugram, IN

Role:

- Collaborated daily with the business owner to understand requirements and propose features.
- Organized and lead the teams consisted of backend, frontend, UI/UX, and mobile developers to streamline workflows.
- Set up and optimized AWS infrastructure for cost efficiency and performance.
- Streamline the deployment process, server management, and alerting to maintain 99.99%+ uptime.

Achievements:

- **Scaled up eCommerce & B2B** platform by **optimising traffic** and speed by multiple factors using AWS resources.
- **Streamlined Deployments, scaling out** and scaling up of application, used various services of AWS to **diversify monolithic application** into various managed services.

Fullstack PHP Developer,

12/2015 – 08/2017 | Gurugram, IN

Incisiv.io(Formerly Vinculum services)

- **Achieved potential savings of hundreds of work hours** per month by engineering a multi-tier research tool, **resulting in a 5x increase in monthly customer delivery capacity**.
- **Orchestrated** and managed **Devops process of internal tools**.

Fullstack PHP Developer, Netmaxims Technology

05/2015 – 12/2015 | Faridabad, IN

- Planned and developed Multiple In-house tools for improving productivity and libraries to speed up the development/coding process by 30%, Improved system design to scale up the system.
- Improve **cloud migration** of website with heavy dataset and with **zero downtime**.

Experience summary

- **CI/CD Mastery:** Comprehensive understanding of CI/CD pipelines and automation tools such as GitHub Actions, GitLab-CI, Jenkins, and AWS CodeDeploy.
- **Infrastructure Automation:** Proficient in using Terraform for automating infrastructure setup, configuration, and application deployment.
- **Docker and Container Management:** Hands on and practical experience in containerising applications, managing dependencies, packaging, and deployments.
- **Cloud Migration Skills:** Experienced in both greenfield and brownfield cloud setups, including migrations and phase-wise expansions.
- **Advanced Scripting and Automation:** In-depth automation capabilities using Python and Bash for managing application stacks and lifecycles.
- **Application Monitoring Knowledge:** Solid understanding of monitoring, alerting strategies, and log analysis with tools like Prometheus and grafana.
- **System Design Expertise:** Proficient in creating scalable designs for diverse applications, from mobile apps to complex dashboards, from prototyping to scaling.
- **Innovative Approach:** Emphasis on simplifying complex challenges and automating routine tasks to enhance solution-oriented strategies.
- **Leadership and Cross-Functional Communication:** Over five years in leadership roles, managing teams of 15+, with strong skills in cross-functional team communication and project management.
- **Comprehensive Development Experience:** Over 9 years of end-to-end product development lifecycle experience, enhancing broad technical understanding.

Talk and workshops

How to Scale up and Out your Laravel App,
